

ANUSHKA

Delhi, India | +91 9599469088 | anushhkadabas@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Indian Institute of Technology, Madras

BS in Data Science and Applications

Madras, Tamil Nadu

Expected Graduation: Aug 2027

Ramjas College, University of Delhi (DU)

B.Sc. in Life Sciences

New Delhi, Delhi

Graduated: Aug 2025

PROJECT EXPERIENCE

Consumer Sentiment & Market Insights – Python, Streamlit, SQLite, Pandas, Plotly, NLTK

Jul 2025 – Aug 2025

Interactive analytics platform evaluating customer engagement patterns across 35,000+ open restaurants using the Yelp public dataset.

- Structured 35,000+ restaurant records from raw JSON logs into an optimized SQLite database, executing SQL pipelines that surfaced a 0.75 correlation between reviews, check-ins, and tips.
- Implemented VADER Sentiment Analysis (NLTK) on customer reviews, correlating text sentiment scores with rating dynamics and identifying peak engagement windows (4 PM–1 AM).
- Developed geospatial and time-series visualizations in Plotly tracking city-level restaurant success scores, uncovering that 4.6% of users drove 44% of total reviews.

Comparative Ad Campaign Analysis – Python, Streamlit, Scikit-Learn, SciPy, Statsmodels

Aug 2025 – Sep 2025

Multi-page Streamlit platform benchmarking advertising ROI and conversion performance between Facebook Ads and Google AdWords.

- Analyzed a 365-day ad performance dataset, running two-sample independent t-tests and cointegration analysis (SciPy/Statsmodels) to prove Facebook's conversion superiority (11.7 vs. 6.0 daily conversions, $t = 32.88$, $p < 0.001$).
- Engineered a Scikit-Learn linear regression model predicting ad conversions from click volume, informing spend allocation across an average ROAS of 1528.27% (Facebook) vs. 475.67% (AdWords).
- Automated time-series wrangling in Pandas and Seaborn to identify seasonal CPC patterns, surfacing cost-effective budget windows in May and November.

Credit Insights: Weekly Credit Card Dashboard – PostgreSQL, Power BI, DAX, SQL

Aug 2025 – Sep 2025

Power BI dashboard tracking credit card portfolio performance for a \$57M+ transaction dataset.

- Connected Power BI to a PostgreSQL database to analyze \$57M+ in total revenue across 667K+ transactions, delivering real-time portfolio performance insights.
- Developed DAX measures and SQL pipelines tracking week-over-week revenue trends across 10K+ customer profiles, identifying top-performing states (TX, NY, CA).
- Automated weekly reporting by linking live database connections to Power BI visuals, cutting manual reporting turnaround and enabling interactive filtering by income bracket and card tier.

WORK EXPERIENCE

Deccan AI

Hyderabad, Telangana

AI training and evaluation company partnering with leading AI labs to improve model reliability.

Data Analyst – AI Evaluation (Remote)

Nov 2025 – Present

- Evaluated and debugged 120+ AI-generated code outputs and conversation threads (Python & SQL) across the Project Maitrix framework, assessing query accuracy, logic, and execution correctness to optimize system accuracy and performance.
- Tested Python tool implementations in Google Colab, independently identifying runtime errors, logical flaws, and hardcoded variables to optimize code functionality prior to model deployment.
- Validated function-calling schemas against execution code, auditing argument types and eliminating redundant tools to ensure data pipeline integrity for LLM agents.

Priti Edusources

New Delhi, Delhi

IELTS Foundation Trainer

Sep 2023 – Dec 2024

- Trained and mentored 30+ candidates in structured verbal and written communication, independently designing feedback approaches tailored to individual performance gaps.

Arya Book Depot Private Limited

New Delhi, Delhi

Assistant Content Developer (Internship)

Aug 2023 – Oct 2023

- Researched and structured academic learning resources, evaluating complex subject-matter sources for factual accuracy, consistency, and structural clarity.

SKILLS

Languages: Python, SQL (PostgreSQL, SQLite)

Analysis: Pandas, NumPy, SciPy, Scikit-Learn, Statsmodels, NLTK (VADER)

Visualization: Power BI, DAX, Plotly, Seaborn, Matplotlib

Tools: Streamlit, Git, GitHub, VS Code

Awards: Deloitte Data Analytics, IIT Madras Programming & Data Science, McKinsey Forward, Catalyst Hackathon (Deccan AI), Top 15% – IIT Madras BS Data Science qualifier
